- TypeScript
- Prisma(ORM)
- MongoDB, SQLite
- VCS(Git), WebSocket
- API development and intergration
- Knowledge in AWS-EC2, S3, PM2 and Nginx.

## LANGUAGE

English

Burmese

## About Me

I am Hein Htet Paing, a passionate web developer with a strong foundation in software development. I have two years of hands-on experience working in both frontend and backend development. Currently based in Bangkok, I am actively improving my skills and seeking an opportunity to work as a web developer where I can grow and contribute to meaningful projects

## WORK EXPERIENCE

May 2023 - Nov 2023  
Promes MM, MICT Park, Yangon  
Junior Web Developer

- Develop API and Dashboard for Billing application using Parse-server and React-Admin
- Develop Frontend for real-estate website using React and Mapbox
- Develop APIs to support mobile applications, ensuring efficient data flow and communication between the frontend and backend
- Collaborate with a dynamic team to design and implement engaging and responsive dashboards

April 2024 - Dec 2024  
JM505 Computer Sale & Service, Bangkok  
IT Assistance

- Selling computer (Laptop & Desktop) hardware and related accessories
- Packing and preparing Notebooks to deliver across every part of the country and oversea
- Diagnostics and troubleshooting (hardware or software issues)
- Virus/malware removal and data recovery
- Upgrades (RAM, storage, GPU) and custom builds
- Maintenance (hardware cleaning, thermal paste replacement, etc.)

Jan 2025 - Present  
Self-Taught Full-Stack Developer

- Researched and applied the use of AI tools (e.g., GitHub Copilot, ChatGPT) to enhance productivity, generate boilerplate code, and debug more efficiently
- Learned and practiced TypeScript for type-safe JavaScript development in both frontend (React) and backend (Node.js) environments
- Explored various frontend and backend packages, such as Redux Toolkit, Prisma, and Express, integrating them into small-scale applications.
- Transitioned from tutorials to real-world projects to solidify understanding and simulate real development scenarios, including building full-stack CRUD apps and API integrations.
